

OREAD MOUNTAINEERING CLUB

Meets Circular - April, 1965

April 13th

Indoor Meet, Borrowash

8.00 p.m.

Harry Pretty will be showing his very interesting slides taken on the British South Georgia Expedition. This is an excellent lecture on what was undoubtedly one of the milestones of the Oread's career and which is still comparatively unknown to most of the current "shower". Harry's colloquial dialogue on some of his slides depicting the mating habits of seals may be educational to some, and the butchering of whales may not appeal to the squeamish, but the sheer hard work of man-hauling sledges to attempt various peaks must appeal to the hardest climbers in the club. Let's have a good attendance, especially following Janes's Presidential appeal for support at meets.

April 24th/25th

Stanage Edge

D. Gadsby

An early meet at Stanage is a good chance to get fit - some of the best of gritstone climbs. Camping at North Lees Farm; just mention Welbourne's name if you see the farmer!

Incidentally, a new tapped water supply has been installed in the field, but unfortunately the litter problem has increased. A chance for Oreads to earn their 'halos' and improve our lot with the farmer.
